

# Character Patterns (Act 7)

Print a regular grid pattern with diamond-like base elements. Use the \ (backslash) and the / (slash) characters to print diamonds and . (dots) to fill the rest of the space.

## Input

You are given  $t$  - the number of test cases and for each of the test cases three positive integers:  $r$  - the number of rows,  $c$  - the number of columns in the grid and  $s$  - the size of each diamond.

## Output

For each of the test cases output the requested pattern (please have a look at the example). Use one line break in between successive patterns.

## Example

**Input:**

```
3
3 1 2
4 4 1
2 5 2
```

**Output:**

```
