

# Digital LED Number

Given a digital LED pattern of a number. You have to find the number and print it. All inputs will be valid as shown.

## Input

Input consists of LED patterns. Each pattern is given in set of fixed number of lines. You have to read input till EOF.

## Output

Print the number corresponding to each pattern.

## Example

**Input:**

```
  _ _ _ _ _  
  | | | | |  
  | | | | |  
  
  _ _ _ _ _  
  | | | | |  
  | | | | |  
  
  _ _ _ _ _  
  | | | | |  
  | | | | |
```

**Output:**

```
232095  
164610  
799518
```
