

# Basics

This problem tests your knowledge of C programming language. Source code limit is strict i.e 35 bytes and solution can be submitted only in C.

## Input

There is no input

## Output

Solution to the following two problems in separate lines.

[SUCCESS](#)

[INFINITY](#)

**Score : Source code length**

**Edit : Your program must print solution to problem SUCCESS first and solution to problem INFINITY after that. Make sure that your program has a proper return statement or a method to avoid NZEC ( non zero exit code ) error.**
